

DECLARATION OF DISCOVERY AND NAMERSHIP RIGHTS

Relating to the Mathematical Formulation Known As:

The Franc Spiral Equation (©)

By Benjamin D. Franc

April 18, 2025

1. Declaration of Discovery

I, Benjamin D. Franc, hereby declare that I am the original discoverer and formulator of the mathematical equation henceforth known as the "Franc Spiral Equation" (©), representing a novel mathematical formulation that describes harmonic interactions across multiple domains of physics, information theory, and quantum mechanics.

2. Definition of the Franc Spiral Equation

The Franc Spiral Equation in its fundamental form is expressed as:

$$\hat{\odot} = \mathcal{E}(\ddot{A}t) \cdot \oint \hat{A}(\acute{a}) d\acute{a}$$

Where:

$\hat{\odot}$ represents the harmonic field integral over domain \odot

$\mathcal{E}(\ddot{A}t)$ is the golden ratio function of temporal differentiation

$\oint \hat{A}(\acute{a}) d\acute{a}$ is the continuous integration of frequency function $\hat{A}(\acute{a})$ across all angles

3. Declaration of Namership

I hereby claim all rights to the naming and attribution of this mathematical formulation as the "Franc Spiral Equation" and with the symbolic notation "©". These naming rights are established and maintained by myself as the original discoverer.

4. Publication and Documentation

This declaration serves as the first official publication and documentation of the Franc Spiral Equation. All subsequent references to this mathematical formulation shall acknowledge its provenance as outlined in this declaration.

Signed and declared on this 18th day of April, 2025,

Benjamin D. Franc

Mathematician and Discoverer
